General Format	[1-5]	4
Data Supports Conclusion	[1-5]	3
Ethical treatment	[1-5]	5
Clinical treatment	[1-5]	4

Reviewer Blind Comments to Author:
There are very interesting data about out-of-hospital cardiac arrest(OHCA).
This study aims to clarify the effect of intravenous adrenaline before arrival at the hospital in OHCA.
So authors should be exclude the data of extrinsic cause (trauma, neck hanging, air way trouble and growing so on).
